SUMMARY:

Highly motivated and skilled Software Engineer with a strong educational background in Computer-Based Instructions and recently obtained HND in Software Engineering. Experienced in geolocation technologies and proficient in developing innovative software solutions. Demonstrated expertise in project development, with a successful track record of creating a pharmacy geolocation system in Bafoussam and partially developing a school management system during an internship at SIGERIS SAL. Passionate about football, handball, cooking, and video editing, with proficiency in Virtual DJ and graphic design. Fluent in English and partially proficient in French.

PROJECTS

PHARMACY GEO-LOCATION SYSTEM: Developed a web-based application to locate pharmacies in Bafoussam, Cameroon. Implemented geo-location algorithms to provide accurate results and integrated user-friendly features for optimal user experience.

SCHOOL MANAGEMENT SYSTEM: Partially developed a school management system, contributing to the design and implementation of features such as student enrollment, attendance tracking, and grade management.

ONLINE SHOPPING SYSTEM: Created a fully functional online shopping system that facilitates product listings, user accounts, and secure payment processing.

HOTEL RESERVATION SYSTEM: Developed a comprehensive hotel reservation system that allows users to book rooms, manage reservations, and view hotel details.
